PROFESSIONAL SUMMARY

Software Development Engineer with 2.5+ years of professional experience designing, developing, testing and deploying scalable, low-latency backend services using **Java, Spring Boot, Node.js** and **RESTful APIs**. Strong in data structures, concurrency, **ACID** transaction design, **SQL/NoSQL** optimization and **microservices**, with hands-on experience in Docker, CI/CD (GitHub Actions), JWT security, unit testing (JUnit, Mockito) and Agile delivery. Proven ownership of the full software development lifecycle and a customer-first mindset, working directly with enterprise clients to turn requirements into reliable, production-ready solutions.

TECHNICAL SKILLS

Languages: Java (OOP), JavaScript, TypeScript, Python, C++, SQL
Backend & Distributed Systems: Spring Boot, Node.js, NestJS, Express.js, REST APIs, Microservices, Kafka, RabbitMQ, GraphQL, JWT Authentication, Multithreading & Concurrency
Databases: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Query Optimization, Indexing, ACID Transactions
Frontend: React, HTML5, CSS3, JavaScript
DevOps & Cloud: Docker, Kubernetes (basics), CI/CD, GitHub Actions, Git, Cloud-based Applications, Production Monitoring
Engineering Practices: Data Structures & Algorithms, System Design, Design Patterns, Low-Level Design, MVC, SDLC, Agile/Scrum, Code Reviews, Technical Documentation
Testing & Tools: JUnit, Mockito, Jest, Postman, Maven

WORK EXPERIENCE

Software Developer — SuperHumanRace **Nov 2024 – Sep 2026**
Delhi, India

- Designed and delivered full-stack features for **5+ enterprise clients** using Java/Spring Boot, Node.js, Python and PHP backends with React frontends on MySQL and PostgreSQL, owning the lifecycle from requirements to production support.
- Improved service quality by refactoring code and adding unit tests (JUnit, Jest), **reducing API response time by ~20%** and **cutting post-release production bugs by ~25%**.
- Served as the primary technical point of contact for key clients, translating business requirements into scalable, well-documented designs and working backwards from customer needs.
- Coordinated **15+ production releases** with distributed teams through CI/CD pipelines in GitHub Actions, supporting release monitoring and operational excellence.

SDE-1 (Trainee) — NBCS Technologies Pvt. Ltd. **Sep 2024 – Oct 2024**
Noida, India

- Built backend modules for **authentication and payments** across 3 product workflows using Node.js and SQL/NoSQL databases; optimized MongoDB schemas to **improve query performance by ~30%**.
- Developed and tested **10+ RESTful APIs** with robust validation and modular code, cutting duplicate logic by ~15%.

SDE-1 (Intern) — Bharti Airtel **Jan 2024 – Jul 2024**
Gurgaon, India

- Built a knowledge-based conversational system (Botpress) integrated with a Java/Spring Boot backend via REST APIs, handling **20+ query categories** in real time, improving resolution accuracy by ~35% and auto-resolving ~40% of queries without human intervention.
- Won **First Place at the "Samadhan" Hackathon (Airtel Digital)** for a project spanning communications, IoT and AI.

PROJECTS

SuperHumanRace Platform (SaaS: CSR, ESG & EE Solutions) **React, Node.js, Java/Spring Boot, PHP, REST APIs**

- Worked across frontend and backend of a multi-product SaaS platform, building user-facing features, scalable backend logic and REST API integrations for clean, reliable client-server data flow.

Concurrent Banking Transaction Engine **Java, Spring Boot, PostgreSQL, JPA, Docker**

- Built a bank-grade transaction engine for simultaneous withdrawal requests using **row-level locking** and tuned isolation levels to guarantee **ACID compliance**; implemented deadlock detection, automatic rollback and audit logging. Tested with JUnit.

Smart Database Query Optimizer **Java, Spring Boot, PostgreSQL, REST API, Docker**

- Built a full-stack tool that parses SQL and live PostgreSQL statistics to recommend composite indexes with estimated performance impact; integrated EXPLAIN ANALYZE plans and a query history dashboard.

Instant Loan Management System **Node.js, MongoDB, JWT**

- Designed the backend solo, including JWT-based authentication/authorization and payment flows; reworked MongoDB schemas to **improve CRUD performance by ~30%**.

EDUCATION

Master of Computer Applications (MCA) — Banasthali University, Jaipur **2024**
Bachelor of Computer Applications (BCA) — Banasthali University, Jaipur **2022**
